## SR. SPECIALIST - OSP DESIGN ENGINEER

*Detailed oriented, self-motivated, and performance driven individual that adapts to new situations and environments quickly. I enjoy being a leader to my peers and helping others to succeed. Also, I strive to become the expert in every situation, and I'm extremely proficient in computer, networking, and cloud-based technologies as well as Microsoft Office.*

## EXPERIENCE

- SR. SPECIALIST - OSP DESIGN ENGINEER** 2021 - Present  
AT&T, Inc., Oklahoma City, Oklahoma
  - Design and implement network infrastructure projects in downtown Oklahoma City and surrounding areas while maintaining complex logistical route planning and transportation of services.
  - Manage over 100 large projects yearly throughout the project lifecycle while also delegating and supervising contractor assistance when applicable.
  - Monitor and establish budget regulations and coordinate the capitalization of assets through new construction developments and legal mandates.
  - Utilize Microsoft Office Suite, Power Automate, PowerBI, and Palantir applications to obtain, develop, and process automations and visualizations.
  - Coordinate splicing, contractor, construction, and management engagement in the outside plant environment.
  - Lead consumer, municipality, government, and corporate relationships to establish fiber and copper footprints.
- PREMIER SERVICE CONSULTANT** Jun 2021- Nov 2021
